

Bush Connect in action

THE DEANES

M E E T C A R O L A N D T R E V O R

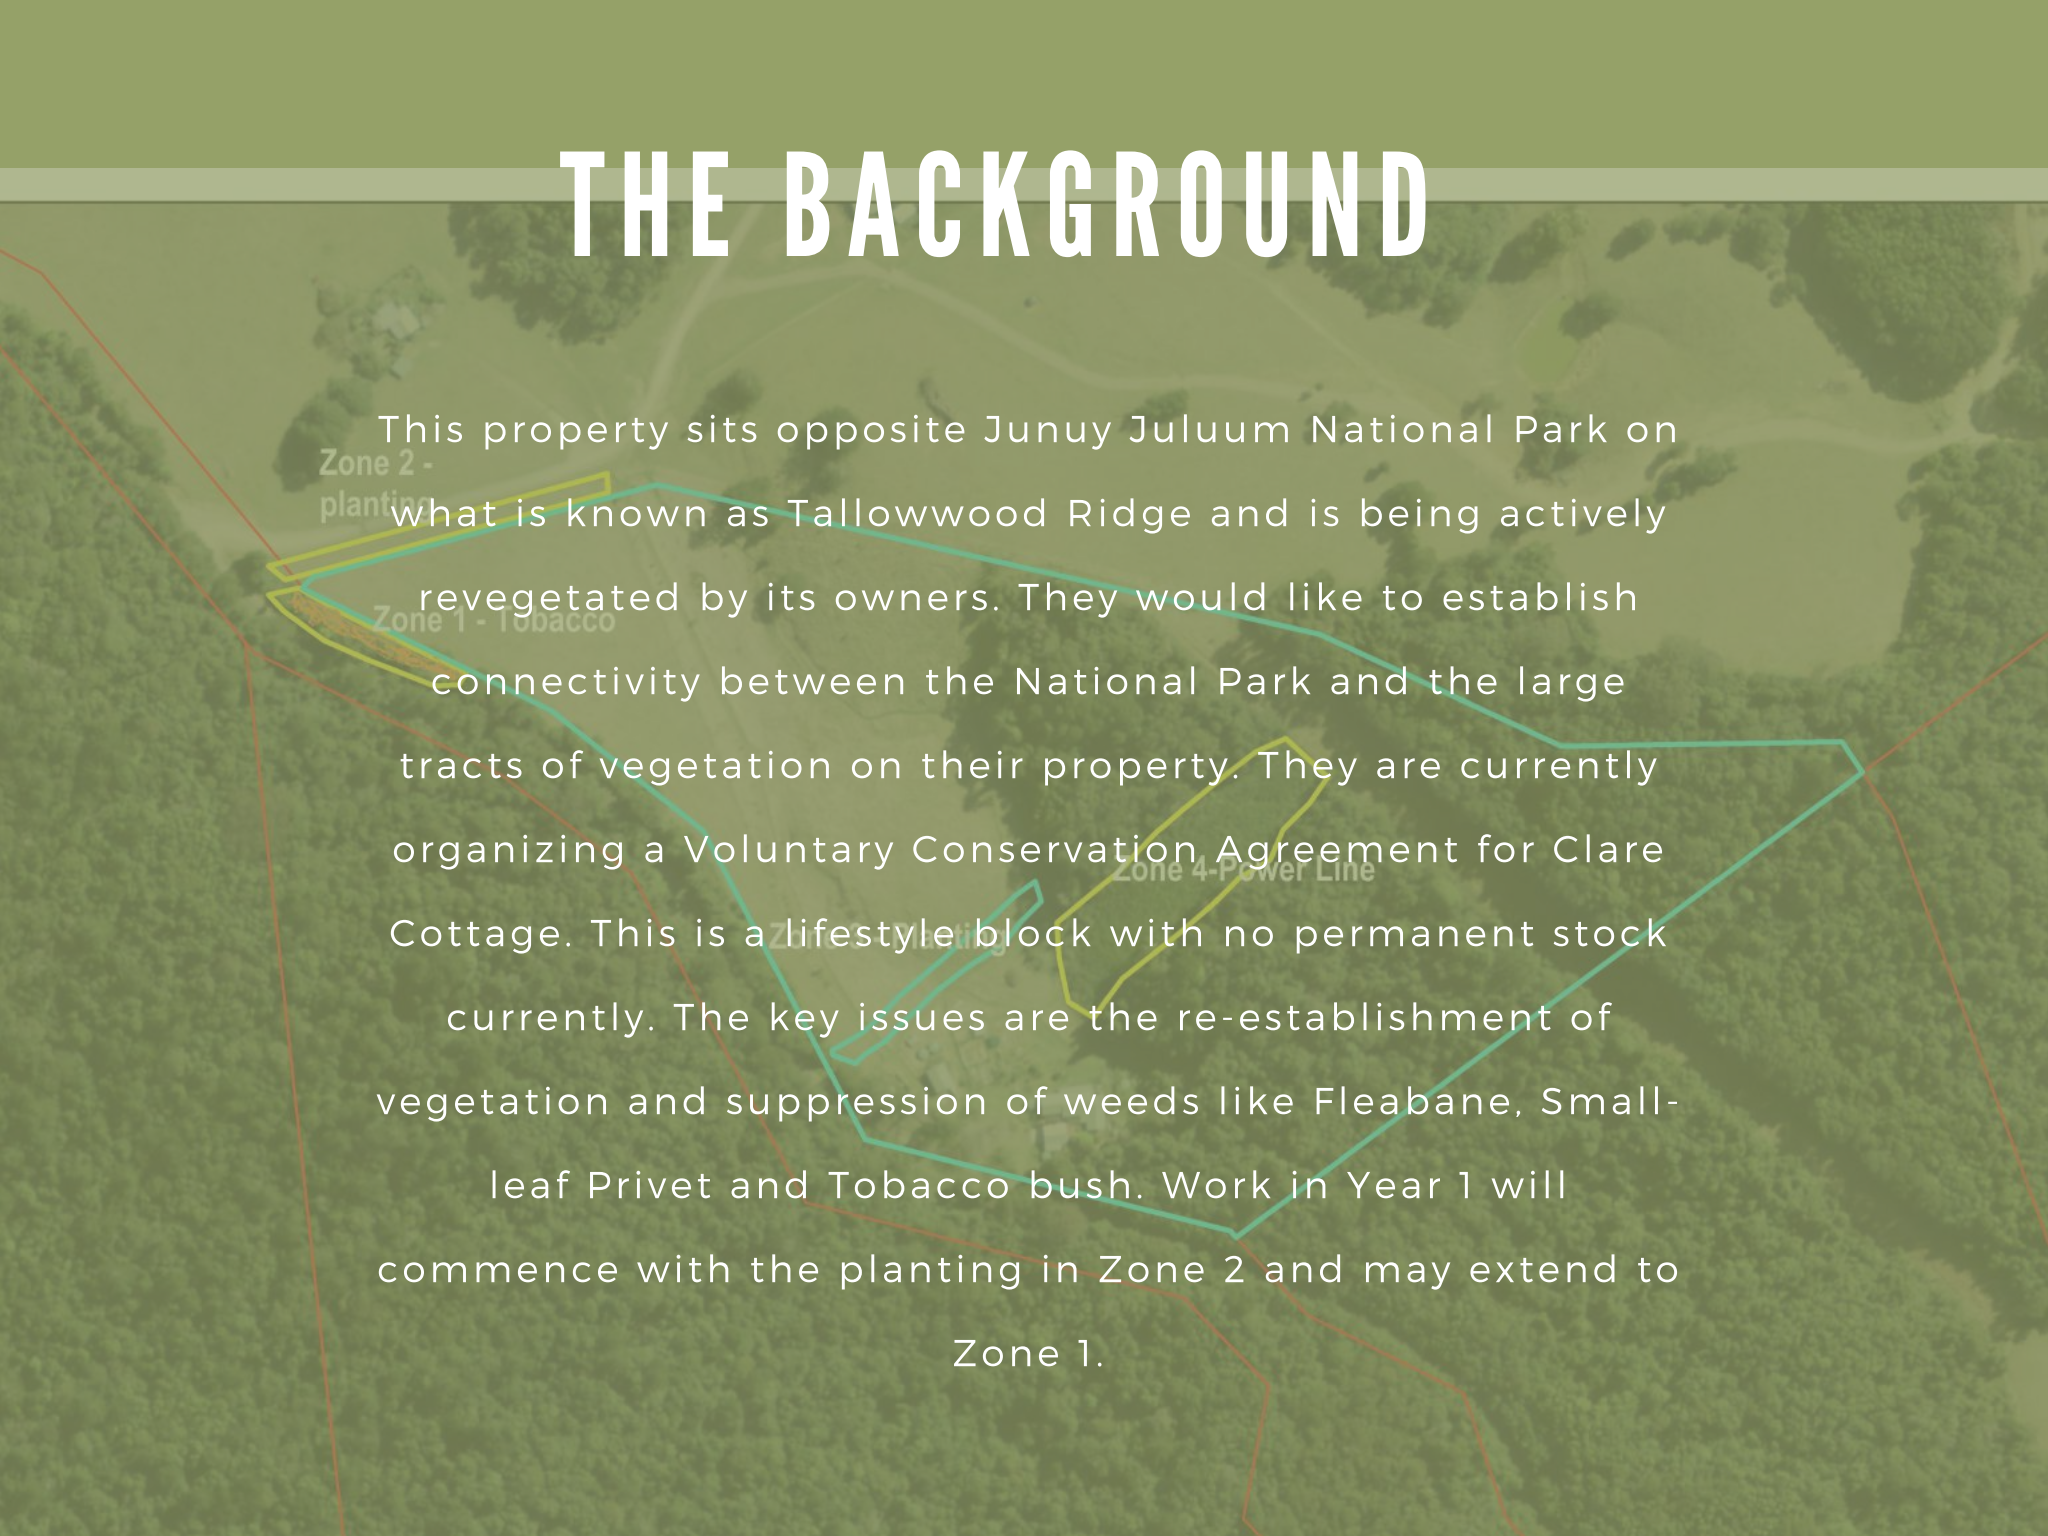

SUCCESS

- Year 1 - over 800 trees planted
- Weed control completed
- Landholder commitment

THE BACKGROUND

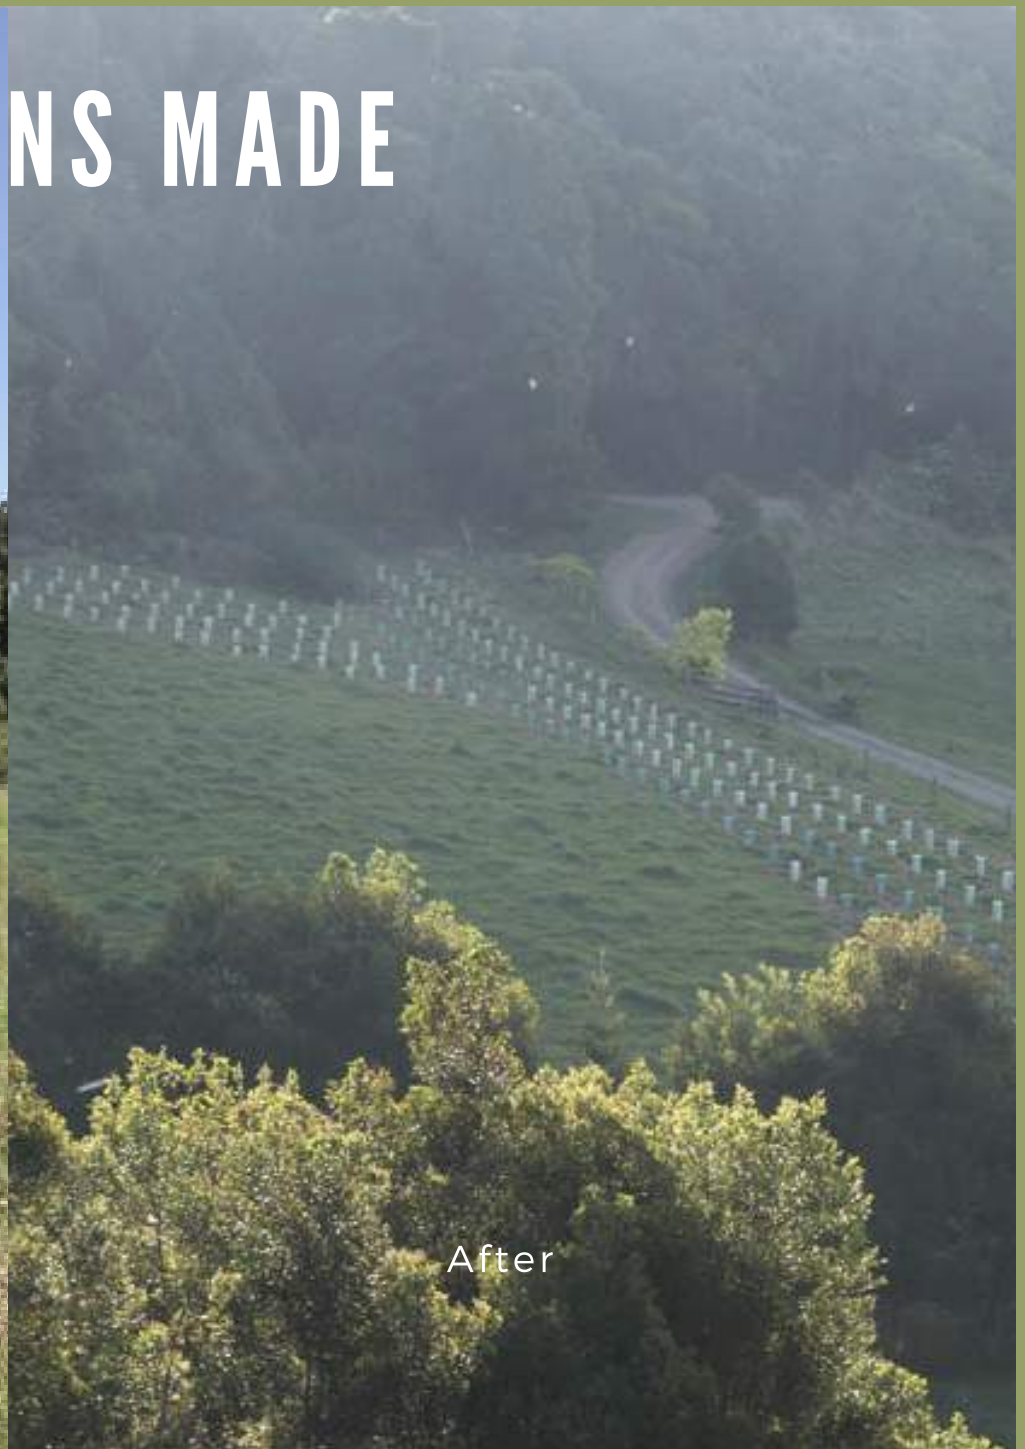

This property sits opposite Junuy Juluum National Park on what is known as Tallowood Ridge and is being actively revegetated by its owners. They would like to establish connectivity between the National Park and the large tracts of vegetation on their property. They are currently organizing a Voluntary Conservation Agreement for Clare Cottage. This is a lifestyle block with no permanent stock currently. The key issues are the re-establishment of vegetation and suppression of weeds like Fleabane, Small-leaf Privet and Tobacco bush. Work in Year 1 will commence with the planting in Zone 2 and may extend to Zone 1.
